# SHARIF ABDULLA AL FAHAD

**CSE GRADUATE | MIS SYSTEM TRAINER | IoT RESEARCHER**

Dhaka, Bangladesh • a.a.fahad0008@gmail.com • +880 1987-434142 • GitHub: faahaad23

## PROFESSIONAL PROFILE

Computer Science and Engineering graduate with experience in MIS system training, user support, digital workflow demonstrations, software issue reporting and IoT-based environmental monitoring research. Worked as a trainer on the VCMIS project in collaboration with UNDP and the Bangladesh Government, supporting government users with practical training and documenting software bugs and improvement opportunities. Additional strengths include leadership, event coordination, communication, public speaking and visual content creation.

## PROFESSIONAL EXPERIENCE

### MIS System Trainer — VCMIS Project

*UNDP-supported Village Court Management Information System (VCMIS) • Bangladesh Government collaboration | 2026–Present*

- Deliver practical training sessions, system demonstrations and user guidance on VCMIS workflows for government officials and relevant stakeholders.
- Support participants in digital case-management processes and routine system-use issues.
- Collect user feedback, identify software bugs and document findings and suggestions to support system improvement.

### Management Trainee — Finishing Department

*GoodEarth Apparels Limited | April 2026*

- Used the Trackwell management system for packing-list tracking and finishing-related reporting; coordinated operational information to support reporting accuracy.

### Student Ambassador — Digital Marketing Team

*Primeasia University | June 2022 – February 2024*

- Supported university communication, promotional activities and student engagement.

## EDUCATION

BSc in Computer Science and Engineering (CSE) — Primeasia University, Dhaka, Bangladesh | Graduated | CGPA: 3.36/4.00

HSC — Cantonment Public School & College, Jahanabad, Khulna | 2019 | GPA: 4.83/5.00

SSC — Govt. Laboratory High School, Khulna | 2017 | GPA: 5.00/5.00

## RESEARCH & CONFERENCE

### Design and Implementation of an IoT and Intelligent Software System for Pollution Monitoring on Time-Series Data in Urban Roads in Dhaka City

*Co-author • Accepted for poster presentation at the 2nd Global Cleaner Production Conference (GCPC 2026), Sitges, Spain, 26–29 October 2026 • Abstract Ref. 875*

Developed an IoT-based monitoring approach using Arduino Nano, KY-037 noise sensor, ENS160 air-quality sensor and AHT21 temperature sensor to collect urban-road noise, CO■-related air-quality and temperature data for time-series analysis.

## LEADERSHIP & ACTIVITIES

- General Secretary, Primeasia University Sports Club (PAUSC) — progressed through organizing and joint-secretary roles; contributed to central sports events including PAUCL cricket tournaments.
- Vice President (Logistics), Primeasia University Debating Club — supported debate activities and logistics; participated in four ATN Bangla television debates.
- Joint Secretary, Primeasia University Robotics Club; Executive Member, Primeasia University Computer Club.

## SKILLS & LANGUAGES

**Technical:** IoT system design, Arduino, basic Python, sensor data collection, software testing and bug reporting, MS Office.
**MIS & Training:** VCMIS workflows, system demonstrations, user support, training facilitation and feedback documentation.
**Professional:** Leadership, event coordination, teamwork, public speaking, debating, Canva, photography and digital content.
**Languages:** Bangla (native); English (professional working proficiency).
